

Delfield Sadia for Cool Kitchens

The heat is on at The Beeches, a privately run hotel in Lancashire, since the owners invested in a new state-of-the-art kitchen area. And the coolest features include five under counter Delfield Sadia refrigeration units specially modified to provide drawer storage for all food preparation areas.

Catering experts CHR equipment designed the kitchen to maximise productivity, with equipment that could step up to the demands of catering for up to 2,000 diners a week.

The design centred on a Garland Ultra Island Suite and the Delfield Sadia RS10260C under counter units were placed around the island to support food preparation.

CHR's Paul Neville chose the drawer system to improve stock rotation. *'Five separate units means cold items can be stored separately, from fish to meat and vegetables,'* he said. *'Everyone knows where to find things and it's all within easy reach – no stretching to the back of a deep fridge to find what you're looking for.'*

Delfield Sadia - For the best in freshness and practicality. We understand your refrigeration needs.
